Train-only Hubei station-center COT diagnostic
Historical persistence error
RMSE vs future CPP COT
Forecast lead (min)
Niushou
Wangzhai
Mizhuang
Thick-threshold transitions at station pixels
Share of valid center records (%)
Forecast lead (min)
History <30 → future CPP ≥30
History ≥30 → future CPP ≥30
History ≥30 → future CPP <30
Train split; 16×16 cache; frozen-R history vs CPP retrieval target.
Pairs overlap; CPP is not independent truth. No validation/test/buffer values read.
