Cloud evolution and the direction of the GHI correction

Observed future fields are shown only for diagnosis.

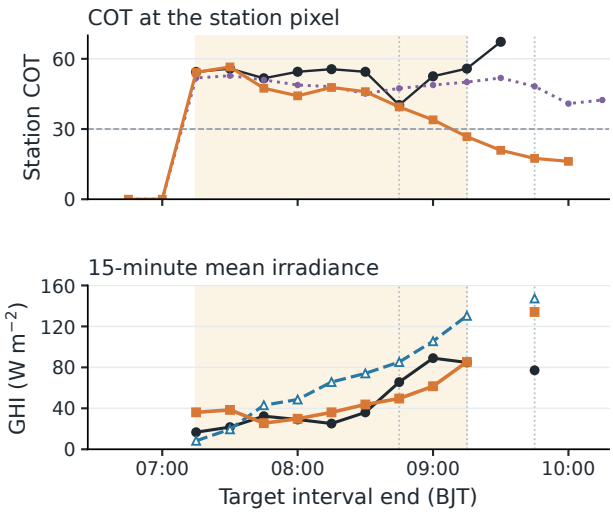

(a) Mizhuang, Hubei · 26 Sep 2025

Initialized 06:15 BJT

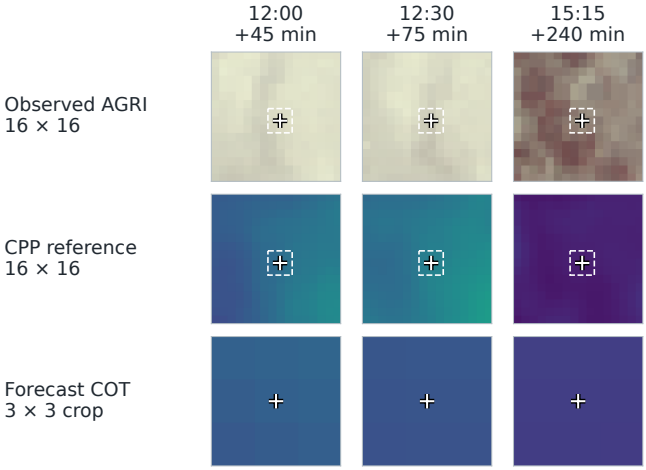

Shown segment RMSE: 26.7 → 14.5 W m^{-2}

Improved segment

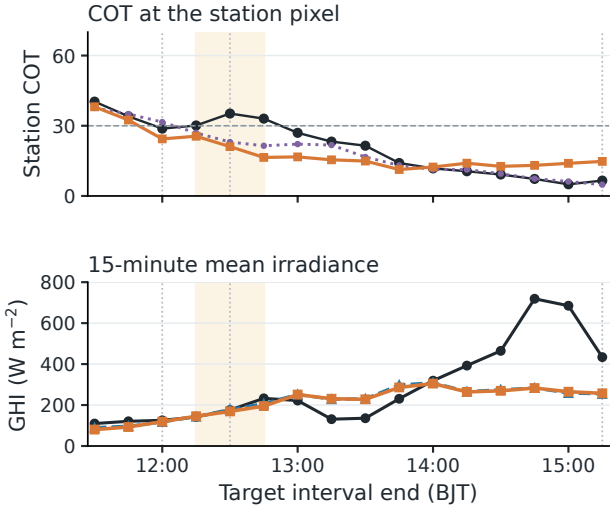

(b) Sili, Hunan · 15 Jun 2025

Initialized 11:15 BJT

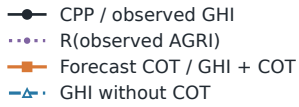

Shown segment RMSE: 14.9 → 22.1 W m^{-2}

Degraded segment

+ station pixel; dashed box: 3 × 3 input. Grey: missing CPP.
Shading: thick-reference segment. GHI: seed 42; y-scales differ.
